

# Your Kaizen e-portfolio

## Implementing the system

- Quick and easy for you to implement – Cloud based service can go live over night and we will guarantee a migration of historical evidence and user information. If you are moving from the NES portfolio you will be guided through an automated migration, making moving to Kaizen easy
- It can easily be adapted and configured for your college or organisation, incorporating your branding and corporate identity
- Value for money – readily available, so much more cost-effective for you than commissioning and developing a new system from scratch

## Training and support

- Kaizen e-portfolio is a specialised product. A dedicated Fry team will install and configure the system so that it meets your needs.
- Fry is dedicated to ensuring that through ongoing upgrades and support Kaizen e-portfolio remains an outstanding, world-class system for managing, and tracking professional development for healthcare professionals at all stages of their careers

# Discover Kaizen e-portfolio

Kaizen e-portfolio has been developed in close collaboration with the RCPCH and has a wide range of functionalities that could revolutionise how your organisation can help support trainees and members with their lifelong development.

in close collaboration with  
the RCPCH.

# Supporting your journey to excellence in achieving high quality patient care

Let us take you on a small tour of what Kaizen e-portfolio is, what it can do and how it can help your organisation look towards a brighter future.

## what does Kaizen e-portfolio do

**Workplace based assessments:** You can complete workplace based assessment from a mobile phone, tablet, laptop, or desktop computer even when offline. Capturing their feedback in the moment, improves the quality and reliability of the feedback, improving assessments, and helping trainees improve.

**Quick recording of evidence from mobile devices:** Mobile-first design allows quick recording of key information whilst on the move and when offline (no signal). Later you can convert the draft into an assessment, log, form, or other type of event, and upload photos, videos, or other documents, and publish it to your timeline.

**Full ARCP workflow:** The supervisor receives a notification when the supervisor's report for ARCP is due. When completed the form is automatically queued for review by the ARCP panel, who complete the ARCP outcomes from as the next part of the workflow. It could then be returned direct to the trainee's timeline, or go for review and sign-off by the administrators.

**Configurable roles and permissions:** Roles can be created and assigned fine-grained access permissions to users and their timelines. Roles can be dependent on a relation, such as location, training-program, or given user. This means roles are relative to the two users in question, for example a college tutor might have access to the timelines of all trainees at the same location, a supervisor to the trainees they supervise, or a LETB administrator to trainees in their LETB.

**Comprehensive form editor:** The form editor is designed to cope with the full range of forms used in trainee workplace based assessment, logs, ARCP review, and all aspects of university use, foundation training, speciality training and revalidation. Dependent questions allow the path through the created form to vary according to the answers given.

**Dashboard with configurable widgets to display summary of progress:** Track progress against training program goals and personal goals allows a trainee to easily see their progress, and what they need to do.

## why Kaizen e-portfolio

**Trainees can Fulfil their Potential - Get the best out of trainee's learning with regular and continual feedback**

- Quick and easy supervisor feedback - Helps trainee and their supervisor identify areas for development more quickly
- Time line - simple and intuitive view of progress and achievements versus curriculum and forthcoming reviews

**Anytime, anywhere, any device - Record & track learning and development all in one place, on and offline**

- Instant access to Kaizen e-portfolio - no signal required. Record and validate workplace based assessments there and then
- Quick draft functionality allows trainees to capture supporting evidence at time of the event on mobile device

**You are in control - Customise your curriculum and create roles and permissions at the click of a button**

- Simple intuitive Curriculum mapping functionality
- Fine grain permission and role delegation of authority. 100% control over role creation with flexible authorities eg. delegate control to a deanery or other department

**Save time and deliver more - Simple reporting for supervisor with autofill functionality - that allows more time for qualitative feedback**

- Reduce running costs - No need for development fees for any changes you want to make yourself

**Safe and secure - peace of mind that your data and evidence is protected**

- All connections between devices and the cloud are encrypted
- Fine-grained role-based permission allow you to control exactly who can access which data.

**Future proof your organisation - Keep up with GMC and other regulatory updates**

- Comprehensive document and form versioning and tracking functionality
- Cloud service that is being continually improved and updated at no extra cost
